

## **SUPER GREAT MOTHER**

***Thy Kingdom come on earth, Thy will be done as it is in heaven. Christ Revealed, Church Reformed, City Rebuilt***

The day conception takes place the life has already taken shape. That's why it is important to be healthy emotionally, mentally, relationally before bringing the child into the world.

Mothers are very special. No matter what we do men cannot win. The children will always run to the mother first. Father's cannot win this. Mothers must bring foundation into the lives of the children.

God made mothers and He has the best instructions for mothers. Simple instructions like this can save our family. We pray every day that God will bless our family. Today when a child needs to behave in class, the parents come to the class and ask the teacher why their children misbehave. In the olden days when the children misbehave, the teacher will ask the parents why the child misbehaved. We have pushed the responsibility of parenting to the teacher.

### **1. Every mother must teach their children to value all things spiritual and value all good things accordingly.**

In the first 4 years of our children's life, teach them value. Teach them how to honor and be truthful. This is the reason why some of the culture remains strong. If we teach wrong values they will not have the foundation to go into this world. When we teach honor and values and they invite these values in their heart, they will not be contaminated with the world. Many parents are afraid that when they sent their children to the school, they will learn bad things. To teach them value is not just to teach about values. We must put value into their lives. Value what they have, value the food that we cook, time, relationships, etc. Tell them to behave and just behave is just talking. We must teach them. The value systems we put into them will make them strong. Even when they meet bad examples, they will know how to discern. Or else they will fall for the temptation.

Just like our immune system, if it is strong we will not be afraid when people sneeze. Otherwise we will be so afraid to go out. We cannot control the world environment but we can control the child. We don't have to be afraid. When we put the right values, they will choose the right friends. Even when they hear the wrong things they will not learn of it. Build the right value systems and we will not be afraid of the negativity that is happening in the world. Our children will know how to discern. Don't sacrifice our child by allowing other people to put values into them. It is not the job of maids to raise our own children up. It is not the job of the grandparents to raise them up, regardless whether we are Christian or non Christian.

### **2. Every super mothers know that their children are destined for greatness**

Every child is a gift of God, gifts from Him so that they become a gift to society. We can look into the child and see that they will rise to greatness. We don't compare our children with others and run them down. That's the reason why they don't rise to their potential if we keep compare them with others. If we say our children are like pigs, they will become like a pig because we confess it. If we want to be great, certain things are expected out of us. If we don't expect anything from our children, we will not care however they behave. Those who are in high places or champions are

groomed from young. We as a father and mother must understand that our children are raised for greatness. They may not be able to do one thing but they can do another. Sometimes we don't realize that simple things like this can change a whole life. A wild plant will never grow to become great. We must train the child where the child should go. Every child must be guided.

If we don't see greatness in our children, we will allow them to do anything. If we see greatness, we will put all the right ingredients into them. Don't do a lazy work. Do a great work into their lives. By the time they reach 15, they are already programmed to win or lose. If they have wrong foundation they can go up and then come down. Put our best investment in them. Don't let our children grow up like wild plant. We must see like Rebekah and hear why God gave us the child and where the child is going. We must look at them destined for greatness. If they misbehave, we must discipline them. Don't correct them because they misbehave. We correct them because they are moving towards greatness. We need to be in a place where we can keep things well and help them through. Mothers must move from ordinary great to super great.

**3. Every mother must teach our children to negotiate and talk and come into a decision making process.**

Don't just tell them do this and that. Tell them why. Teach our children to talk and make right decisions. Most of our children cry to get what they want. This is not negotiating. This is manipulation. God didn't give them tears, but a mouth to talk.

If we shut down their actions, we will not value their opinions. If their actions are wrong, we can correct them at that time. It's not about DON'T this and that. If we train them to talk well, when they go out they will know how to converse. See the children nowadays they do not have confidence to talk to other people. We only want them to listen and not talk. Ask them what they want and negotiate with them. If we don't know how to talk, we cannot go up higher. A lot of the time, the children do not have confidence because we shut them down all the time.

A lot of children now only know textbooks and never know how to answer the questions of life. Invest time and talk to our children. We will be surprised that they can learn things much quicker than us. If they do wrong, we can talk to them and correct them. If we shut them down, we won't know. If we don't know what they are thinking, they can be attacked when they go out. Train our children to talk. Explain values and get our children to talk. They must have the power to make decision so that they can face the world. A lot of strong people may bully our children but they must know how to rise up to negotiate.

**4. Every mother must make sure that they value important relationships**

We must teach them relationships that are important and what relationships that can make them stronger. Teach them how to honor, available and accountable. Teach them how to behave and talk to their elders, grandpa, grandma, younger and older brothers, etc. Put the rules of engagement into their lives.

All of us are afraid that our children will mix with wrong company. Wrong company corrupts morals. This is something we don't teach in the home. All through life after the children leaves

school, what gets them going? It is the ability to build good relationships so that they surround themselves with good people. This will make the child a strong child. Teach them what good relationship is and what bad relationships is. That's why we bring our child to the people we honor. Teach them how to call the elders or say good bye to elders. Teach them how to enter other people's house properly. Whatever is done, we must teach them values. Teach them how to relate to their teachers and all other teachers in the school. Teach them how to build good relationship. When they have this, they will surround themselves with good people. A lot of us don't succeed in life because we mix with bad companies.

It is easier to make friendship in smaller groups. We cannot bring our children up without relationships that are strong. If we don't take interest in our children's education, no one else will. We must know that it is important. We must have honorable relationship.

If things inside the house go wrong, it will go wrong at the outside too.
