

THE POWER OF NOW

The power of now is an advantaged position

God gives us the power to become. What we do now can change the past. It matters more than the failures of the past. If we change now, we will be empowered now. We will be able to do beyond what we have done. Seize the now and take hold of the now. If we don't take hold of it, someone else will.

We are not shaken by what we see or hear or what we go through. What we believe is greater than all these. Our dependencies are not of the world. The devil is a loser so stop following the loser.

God gave us domain so that we can change it, not to get lost there. God will change the way we think. When we go into the world, we change the world; not be changed by the world. Sunday morning is for us to be tuned in frequency.

What do we want to be? We cannot be confused by now. The life that we live now, must be the life of Christ. After Jesus came into our heart and we still want to live our own way, then we have not progress. When a man blames God, there is no more help and there is nothing God can do.

We need to hear well. This year God will speak to us clearer than ever before so that we don't act in negatives.

Strategic Men. A lot of things are done when we have good people. When we go to a good doctor the problem stops. If we get a bad doctor, the problem continues.

Health is cheaper than the medical field. Good food is cheaper than medical bills.

Strategic men are sharp and accurate like the select arrow. Strategic men will not leave the job. They are available for the Kingdom than anything else. We must be totally yielded to God because this year is a year of action.

When heavens are open, the Holy Spirit will demonstrate. We must do quality work. That's why we need good men and well trained people to do the work. If we have good song leaders, we can bring the Holy Spirit down. One good prayer warrior can lead the whole church into prayer.

How to identify these strategic men?

- When they join us we become stronger. Some people when they joined us, we become weaker. If we have these people, run.
- When they join us, we have energy to finish the task. There are dynamics and synergy. All things work together.
- When they join us, they operate on selfless sacrifice. They lay down their lives. Everyone must give out their best. We have **no right to demand** where we never sacrifice or sown. We go to the bank and put money inside. We cannot take money out if we don't put money inside.

When we are in a team, how we use our time, energy and money is important. We cannot be available if we never give our time to the team. If one player in a soccer team goes out for food while the competition is on, the whole team can lose the game.

We cannot quit on Papa and say we don't have time. Make time.
