

WHAT MUST WE DO TO BUILD A NEW MALAYSIA

After the birth of New Malaysia, we must protect what we have given birth to. It's not about money. We must protect it so that everything that is given to us will not be lost.

God can make all things beautiful in the right time. The Power of Now is important for us to realize. Today is the day of salvation. When we hear His voice today and now, this is the day of salvation. We can cut off the past. We may be slow before but now, a whole new world will be opened up. God moves us on time and He is precise in His movement. God has no plan B because He never fails.

There is synchronization between heaven and earth. God does not want to do things by Himself. He will show us how it works and form a partnership. When God speaks the word, He wants someone on the earth to capture it and speak it so that we can pave the way and prepare the way for the Lord. If we hear the word and not doing anything about it, there will be no expressway.

God wants us to partner with Him so that we can do what needs to be done. Do our best and leave the rest to God. We cannot do everything. We can only do our share and God will continue.

Do we want to be part of New Malaysia? The church must be ready.

1. We have to change the FREQUENCY of our language.

We cannot be speaking Christian language which the people outside don't understand. This GE14 is so different. It's not about race but about the frequency that is vibrating in their hearts. If the church wants to reach the world, we must speak the language that they can understand. We are sending out frequency and message, the things that we are for and the things we value. When this frequency is sent out, it is not just to unite the Christians. It is for all people to be touched. We must reach them.

Learn to find the frequency that we can talk to them so that by the way we live, they change their perspective about us.

2. The church must RAISE UP LEADERS that can penetrate into the community

So many times the church just raise people up to take of the inside but none for the outside. Who can we send, who will go for us? We must raise up the quality of leaders so that we can put them at the right place. If we have never take charge of a cell group, how can we govern a whole city? The training is here in the church. We have great challengers; the devil and the religious people.

We have to become better, sharper, and clearer so that we can tell them the dreams of what needs to be done. We are the only one who can help them make their dreams come true. Just like Daniel and Nebuchadnezzar.

We must never think that we know everything. There are people who know better. We have to grow and become free and clear and competent in our own skills. The world is looking for strategic men. The political parties have people but they need the right man to lead.

3. We must remember that this dimension is PART OF THE KINGDOM MANDATE

We are going to the next level. If we want to change the world, the world will increase. We must accept this dimension of the mandate.

If we want to change the world outside, we must first organize our world well. For too long the people in the church just do church work. The work of the church is to change the world and we need that. In order for us to rebuild and design the nation, we must accept this as part of our lives and responsibility.

We need to be clear in our head. The world is looking for strategic people. The wise men of Babylon cannot help. They need to bring people from Israel because they do not have the answer. If we cannot accept this dimension of changing Malaysia as a Kingdom Mandate, God can never use us.

When we are ready, the door will be open. If we are ready and receive the mandate, whatever that is in our heart will become a reality. God prepared us to contribute. We are not serving the world but serving God our Father. The people's salvation and

progress is our responsibility. Anything that is happening out there is our responsibility. If God wants to help the city, He will raise us up. We are His people.

When God raised us, it is to use us to meet the needs of the people's lives. This is the God of the city. The church that we raise up will have all the necessary tools to redesign the city. There are so many things they don't know. For us we can do all things well and we have many answers.

Isa 61:4 Then they will rebuild the ancient ruins, They will raise up the former devastations; And they will repair the ruined cities, The desolations of many generations.

For many generations the blessing has never come. When we are not ready and struggle within, we are not competent to cross to the other side. But once we accept this Kingdom Mandate and help them, God will prepare the pathway and we can build the bridge to go to the other side. God put the church here in this city for the town. God raised us up not just to bless ourselves. He raised us up and put us in Muar so that we can look after this territory and terrain. This is our playing field and our place of responsibility. If we want to be responsible, God will give us the grace and show us how to rule and reign. If we are a good leader, more people will come this way.

4. We must decide now how far we will go for national transformation

It is not a fashion or a trend. It must become a way of life. The people in the world don't have the answers when it comes to about the higher things of God. God wants us to learn and know that the people outside do not have answers. They are afraid to move forward because everything about the system is crumbling.

Let our church become a contributor to the society. It is not just about cleaning the drains but also cleaning their brains. Our life must be honorable and the people must see us a people with great quality. We cannot say we don't have time. We have to make time.

Increase our spiritual capacity so that our stature will change. When we absorb more and more of the Holy Spirit we will become empowered and spiritually strengthened for the work that God wants us to do. If we allow God to work in us a little bit more, He will allow us to enter into the domain. He wants us to succeed, not go into a suicide mission.
